

# APPERLEY MACHINES

## USED MACHINE DETAILS

Make: Apperley

Model:- T8

*Stock Reference AS205*

Description:- This machine is our own demonstrator machine, build for use primarily in our contract honing department it has an 8-metre workpiece capacity with capability to hone small bore tubes (we've honed down to 15mm diameter) yet is just equally competent on large diameter workpieces (up to 750mm o/d). We've even used it to hone 15m long submarine periscope tubes from both ends achieving 0.05mm tolerance. It was new in 2012 and has a Siemens touch screen control operating electric drives controlling 15kW rotation, 15kw stroking and 5.5kW push expansion motors. It has mechanical end-clamping which is perfect for both thick and thin walled workpieces. It can be supplied as a full turnkey package with tooling, consumables, delivery, installation, commissioning and training depending on budget

Price:- From £125,000 (+VAT for UK sales) depending on package

Terms:- Pro-forma. FCA (loaded on your transport, ex-works Cheltenham)
